## PROFILE

Final-year BSc Information Technology student focused on software and web development. Hands-on experience building web applications and CMS-based systems (Drupal), plus academic projects using Python, JavaScript, PHP and SQL. Seeking a software/web development placement or junior role where I can ship reliable features, work in a team, and keep improving my engineering fundamentals.

## TECHNICAL SKILLS

- Languages: Python, Java, JavaScript, PHP, SQL
- Web: HTML5, CSS3, responsive UI, Bootstrap
- Back-end: Flask (Python), PHP (server-side scripting)
- Databases: relational database fundamentals, data handling, basic schema design
- CMS: Drupal site building, content structures, roles and permissions
- Tools: Git/GitHub, Figma, Microsoft Office, Visual Studio / IntelliJ
- Concepts: SDLC, requirements analysis, Agile teamwork, security awareness

## SELECTED PROJECTS

- SkillSync (Honours Project) AI-enabled micro-internship platform connecting students and SMEs (ongoing).
- Supetama (Client Project, ongoing): Hospitality staffing platform; AI-assisted matching, chatbot support; facial recognition/verification explored (prototype stage).
- QuickStrip.co.uk (Team 26) built a client web prototype and supported AI element integration within a cross-disciplinary team.
- BlueWave Scuba Diving Club CMS (Drupal 10) developed a CMS with role/permission workflows, trips/booking features, reviews, and reporting views.
- Active-Community — PHP/HTML/CSS web app with login/registration, profile pages, session booking, reviews, and instructor approval flows.
- Inventory-System — Python inventory system to manage products, track stock levels, and generate inventory reports.
- Learn-Basic-Math — multi-page educational website (HTML/CSS/JS) with topic pages and interactive elements.
- Calculator — simple Python calculator script.

## EXPERIENCE

**Clearing Assistant — London South Bank University**

Aug 2024 – Sept 2024

- Supported prospective students with clearing and admissions queries in a fast-paced environment.
- Managed student data and administrative tasks using Microsoft Office.

## VOLUNTEERING

**CSI Ambassador — London South Bank University**

Nov 2023 – Present

- Represented the university at events, engaging prospective students and promoting Computing programmes.
- Strengthening communication and presentation skills through outreach and support activities.

## EDUCATION

**BSc Information Technology — London South Bank University (London, UK)**

Sept 2023 – Present

**Modules:** Fundamentals of Computer Science; Fundamentals of Software Development; Discrete Mathematics; Software Development; Requirements Analysis; Professional Practice; Analysis and Design; Web Technology; Information Systems; System Administration and Maintenance; Developing Applications; Big Data and Database Systems; Smart Internet Technologies; Systems and Cyber Security; ICT Project Management in Practice; Content Management and Development Frameworks for Web; Computer Science Project (Honours).

## TRAINING

- Data Science and AI Bootcamp (London South Bank University) focused on Python, data science, and AI.
- Python Bootcamp — advanced Python programming practice.
- LEGO Robotics Training — built and programmed LEGO robots as part of CSI Ambassador training.

## LANGUAGES

- English (fluent)
- Bengali (native)
